PROFESSIONAL SUMMARY

Entry-level Python Developer with hands-on experience in backend development, REST API design, ETL pipelines, and data engineering. Proficient in Python, Flask, SQLAlchemy, PostgreSQL, SQLite, and Pandas, with practical exposure to API integration, data validation (Pydantic), automated testing (Pytest), and Git/GitHub workflows. Built and deployed full-stack and data-pipeline projects independently; seeking an entry-level Python Developer, Backend Developer, or Data Engineer role.

TECHNICAL SKILLS

- **Languages:** Python, SQL, HTML, CSS
- **Backend & APIs:** Flask, REST APIs, CRUD, Authentication, Password Hashing, ORM (SQLAlchemy), JSON, HTTP, Backend Development, API Integration
- **Data Engineering:** ETL Pipelines, Data Pipelines, Data Warehousing, Data Integration, Data Transformation, Data Cleaning, Data Validation, Pandas, NumPy
- **Databases:** PostgreSQL, SQLite, MySQL, SQLAlchemy, DBMS, NoSQL (Basics)
- **Engineering Tools:** Pydantic, Requests, Tenacity, Boto3, AWS S3, Pytest, Unit Testing
- **AI / ML:** Machine Learning Fundamentals, Artificial Intelligence, NLP, Computer Vision, Data Analysis
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms, SDLC, Agile, Scrum
- **Tools & Version Control:** Git, GitHub (branching, pull requests), Postman, Render, Streamlit Community Cloud, VS Code, Power BI, Excel

INTERNSHIP EXPERIENCE

Python Development Intern — Synent Technologies (SYN-SIP)

Jul 2026 – Aug 2026

- Contributed to Python-based development goals as part of an AICTE-affiliated internship program; delivered assigned modules on schedule and followed clean-coding and SDLC practices.
- Received a certificate of completion and letter of recommendation for consistent performance across the internship duration.

Python Development Intern — Oasis Infobyte (OIBSIP)

Jul 2026 – Aug 2026

- Completed five Advanced-tier Python projects — Voice Assistant, Weather Application, BMI Calculator, Random Password Generator, and a multi-user Chat Application — applying OOP and structured problem-solving.
- Used Git/GitHub for version control across all deliverables and followed SDLC and clean-coding practices under mentor guidance.

Python Development Intern — Zaalima Development Pvt. Ltd.

Jul 2026 – Present

- Engineered an **Enterprise ETL Pipeline and Data Warehouse Synchronizer** in Python, extracting business data from external APIs including Stripe and Salesforce, and handling API pagination, rate limiting, and retry logic with Tenacity.
- Cleaned, standardized, and validated data with Pydantic, mapping heterogeneous API structures into unified schemas; tested transformation logic with Pytest, stored raw JSON via Boto3/AWS S3, and persisted synchronized records to PostgreSQL using SQLAlchemy.

AI Intern — Syntexhub

Aug 2026 – Present

- Worked on three applied AI/Machine Learning projects, focusing on Python-based model development, data processing, and problem-solving under mentor guidance.

PROJECTS

Enterprise ETL Pipeline & Data Warehouse Synchronizer, Python, Pandas, Pydantic, Tenacity, Boto3, SQLAlchemy, PostgreSQL, Pytest

- Built a resilient ETL pipeline integrating Stripe and Salesforce APIs with pagination handling, rate-limit management, and retry logic; validated and transformed data into a unified PostgreSQL warehouse.

Medicine Reminder App, Python, Flask, SQLite, SQLAlchemy, REST API, HTML, CSS

May 2026 – Jun 2026

- Architected and deployed a full-stack medicine reminder application with automated scheduling and secure CRUD-based tracking; designed RESTful APIs cutting manual tracking effort by ~70%.
- Shipped a production-ready build on Render via Git/GitHub and validated all endpoints with Postman, achieving zero critical bugs at launch.

Smart Job Tracker, Python, Streamlit, SQLite, Pandas

Apr 2026 – May 2026

- Built an interactive job-tracking dashboard with real-time filtering, CRUD logic, and CSV export/analytics, reducing application review time by ~50% while managing 50+ entries.

Hand Gesture Recognition, Python, Computer Vision

- Built a Python-based computer vision system for real-time hand gesture detection and classification.

Sentiment Analysis, Python, NLP

- Developed a text sentiment classification project in Python using natural language processing (NLP) techniques.

Maze Solver — A* Algorithm, Python

- Implemented the A* search algorithm in Python to compute optimal paths through a maze.

Voice Assistant, Python, SpeechRecognition, pyttsx3, Requests, OpenWeatherMap API

- Built a voice-controlled assistant supporting voice commands, text-to-speech, Google search, weather lookup, and app launching.

Multi-user Chat Application, Python, Socket Programming, Threading

- Developed a real-time client-server messaging application supporting multiple concurrent users.

Weather Application, Python, Tkinter, OpenWeatherMap REST API

- Built a GUI application for real-time temperature, humidity, and wind-speed lookup via API integration.

BMI Calculator, Python, Tkinter, SQLite

- Developed a GUI-based BMI classification tool with SQLite-backed history tracking.

Random Password Generator, Python, Tkinter

- Built a configurable utility for generating secure random passwords.

CERTIFICATIONS & TRAINING

- Infosys Springboard — Python Programming, OOP, DBMS, SQL, NoSQL; Software Engineering & Agile Development, Agile Scrum in Practice (Mar–May 2026)
- Tata — Cybersecurity Analyst Job Simulation, Forage (Jan 2026); NIT Trichy Pragyan — Python Programming Workshop (Feb 2025); LinkedIn Learning — Excel Essential Training (Nov 2025)
- NoviTech R&D Pvt. Ltd — Artificial Intelligence (May–Jun 2025) & Data Analytics (Feb–Mar 2025)

EDUCATION

M.I.E.T. Engineering College, Tiruchirappalli, Tamil Nadu — Sep 2022 – May 2026

B.E. in Electronics and Communication Engineering, CGPA: 8.58/10 | Swami Vivekananda Matriculation Higher Secondary School — HSC: 92%, SSLC: 95%
